

Exam Date & Time: 22-Jun-2024 (02:30 PM - 05:30 PM)

MANIPAL ACADEMY OF HIGHER EDUCATION

MIT BLR - BTech VI Semester - End Semester Makeup Examination - June -2024

Cloud Computing [CSE-4063]

Marks: 50

Duration: 180 mins.

PART-A

Answer all the questions.

- 1) Choose all the Cloud Computing Characteristics and explain .
(5)
 - A)
 - B) The cloud computing approach comes with a great deal of dangers and obstacles. Identify all the risk and challenge associated with cloud computing and explain all. (3)
 - C) Identify and explain server containment and consolidation. (2)
- 2) Discover the working of virtual machine manager with diagram. Outline the properties of the Virtual Machine Manager (VMM).
(5)
 - A)
 - B) With example explain the Moore's Law . (3)
 - C) Identify any two properties of Service Oriented Architecture and explain in brief. (2)
- 3) Identify and explain the key features and benefits of message-oriented middleware (MOM) in distributed systems.
(5)
 - A)
 - B) Analyse role of metadata in message-oriented middleware (MOM), and how does its management contribute to the efficient processing of messages in distributed systems? (3)
 - C) Conclude, how does Swift as a scripting workflow system, streamline the development process and improve productivity in software development projects? Provide examples of how Swift's features and capabilities contribute to efficient workflow automation and code execution. (2)
- 4) Imagine you are tasked with migrating a company's IT infrastructure to the cloud. During the planning phase, you need to consider various cloud capabilities to ensure a successful transition. Analyse how you would leverage specific cloud capabilities to address the challenges. explain any 5. (5)
 - A)
 - B) Conclude the programming support of google app engine architecture in distributed system (3)

- C) A service level agreement (SLA) is an outsourcing and technology vendor contract that outlines the level of service that a supplier promises to deliver to the customer. Classify the types of service level agreements? Explain the common elements and metrics of Service Level Agreement. (2)
- 5) Analyze and explain the different data types and operators supported by pig. (5)
- A)
- B) Analyse what is data privacy and outline the measures to ensure the data privacy in cloud computing. (3)
- C) Identify and outline the components of identity and access management. (2)
