

Exam Date & Time: 10-May-2024 (02:30 PM - 05:30 PM)

MANIPAL ACADEMY OF HIGHER EDUCATION

MIT BLR - BTech VI Semester - End Semester Examination - April / May -2024

Programming in C sharp [CSE-4307]

Marks: 50

Duration: 180 mins.

PART-A

Answer all the questions.

- 1) List out features of ASP.Net (3)
 - A)
 - B) Illustrate with an example program how scope clashes for local variables is handled in C#. (3)
 - C) Briefly explain language interoperability in .Net (4)
- 2) Illustrate with an example why enum constants must be unique in their scope. (2)
 - A)
 - B) Consider a class named MainEntryPoint and illustrate with a C# program, how length of the string is classified according to the input characters entered by the user. (5)
 - C) Use IAnimal interface and demonstrate how it can be used to print different animal sound through C# program. (3)
- 3) Illustrate how a unary operators (+) inside a class Complex can be overloaded in a C# program. (3)
 - A)
 - B) Apply concept of Regular expression to write C# program which checks given mobile number 9925612824 (12 Numbers) and 897-4567-456 (10 Numbers) are valid and rest number types are invalid. (4)
 - C) Demonstrate events by considering Order class as publisher and Email and SMS classes are subscribers through C# program. (3)
- 4) Show how .NET platform address the problems of DLL Hell through assemblies (3)
 - A)
 - B) Write a C# program that creates and initializes a list of strings, removes an element, and (5)

adds an element to the end of the list. After each modification, it iterates through the strings by using a foreach statement or a for loop

- C) Distinguish between private and shared assemblies. (2)
- 5) Code groups are arranged hierarchically with the All Code membership condition at the root, with a neat diagram illustrate how code groups are arranged. (3)
 - A)
 - B) Use Deny() method and write an C# program after building the code the output will state *Failed to open file.* (3)
 - C) Demonstrate how WPF supports graphical subsystem for rendering user interfaces in Windows-based applications with its key features. (4)
