

Exam Date & Time: 11-May-2024 (02:30 PM - 05:30 PM)

MANIPAL ACADEMY OF HIGHER EDUCATION

MIT BLR - BTech VI Semester - End Semester Examination - April / May -2024

Internet of things security [IT-5022]

Marks: 50

Duration: 180 mins.

PART-A

Answer all the questions.

- 1) Examine the several stages of the real-world evolution of the Internet of things. Describe its uses in a variety of applications as well. (5)
 - A)
 - B) Identify step-by-step procedures for designing IoT application in Hospital Domain with suitable diagram. (3)
 - C) What Are the Various Home Automation Technology Operating Standards? (2)
- 2) Identify the smart home network using pervasive connectivity. (5)
 - A)
 - B) List out the function of embedded systems and communication protocols on the Internet of Things. (3)
 - C) What kind of technology evaluates all the data that Internet of Things devices send back? Describe everything in detail. (2)
- 3) Describe how IoT security standards in air pollution and noise pollution monitoring may help safeguard the environment better. (5)
 - A)
 - B) Install the Smart Irrigation System by using the multi-server authentication approach. (3)
 - C) List the privacy risks that IoT devices most frequently face. (2)
- 4) Determine the secure connections, management, and analysis of IoT data in wearable gadgets. (5)
 - A)
 - B) Examine the smart parking use case using IoE. (3)
 - C) What is the most recent drones version available in current market? (2)

- 5) To connect an IoT printer to a Raspberry Pi, write Python code. (5)
- A)
- B) Enumerate many single-board computers that serve as substitutes for the Raspberry Pi. (3)
- C) Give the Raspberry Pi device versions that have been released thus far. (2)
