

Exam Date & Time: 25-Nov-2024 (02:30 PM - 05:30 PM)

MANIPAL ACADEMY OF HIGHER EDUCATION

MIT BLR - BTech VII Semester - End Semester Examination - Nov / Dec -2024

PROGRAMMING DATA STRUCTURES AND ALGORITHMS [NPT-4070]

Marks: 50

Duration: 180 mins.

PART-A

Answer all the questions.

- 1) Discuss the methods to specify an algorithm by highlighting the differences between an algorithm and program. (4)
 - A)
 - B) Elaborate and explain the algorithm used for time complexity. (3)
 - C) Discuss the significance of a transpose matrix in data structures. (3)
- 2) Illustrate the conversion of Infix to Postfix operation by taking any arithmetic expression. (4)
 - A)
 - B) Differentiate between Stacks and Queues. (3)
 - C) With an example code, explain the insertion operation at the end for a Singly linked list. (3)
- 3) Illustrate and explain the methods for deletion of a node in case of a Binary Search tree. (4)
 - A)
 - B) Enlist tree traversal operations and explain any one with suitable example. (3)
 - C) Elaborate the terminologies used in AVL tree with proper definitions. (3)
- 4) With an illustration, explain the adjacency list to represent graphs. (4)
 - A)
 - B) Suggest an algorithm for Linear search considering both Best case and Worst case complexities. (3)
 - C) Discuss the steps of Merge sort algorithm. (3)
- 5) Suggest an algorithm for Merge sort highlighting the significance of the same. (4)

- A)
- B) Discuss the steps involved in heap sort. (3)
- C) Discuss the necessity of Breadth First Search algorithm. (3)
